

SETH JONES
Electrical Engineer

@ sethj5878@gmail.com <https://www.linkedin.com/in/seth-jones-1211ba200/>
(480)743-2629 Phoenix, AZ

SUMMARY

My name is Seth Jones. I am a recent college graduate in the fields of Electrical Engineering and Cyber Security. My areas of experience are project management, embedded system design, wiring design, and malware analysis. While studying I also participated in engineering projects, leading multiple successful company-sponsored projects sponsored by companies including Boeing and W. L. Gore. I am an Electrical Engineering graduate with leadership experience in embedded systems, power electronics, and autonomous systems design seeking to contribute to advanced defense and digital engineering programs.

EXPERIENCE

- SEASONAL ORDER FULLFILLMENT

Old Navy

 - Maintained a well-kept sales floor
 - Designed effective sales tactics
 - Fulfilled orders in a high-paced, high-order-quantity environment

11/2024 - 12/2024

Flagstaff, AZ
- SEASONAL ORDER FULLFILLMENT

Home Depot

 - Handled large scale client profiles in excess of \$60,000
 - Operated heavy machinery in confined spaces under time constraints
 - Maintained effect Backend and Frontend communications with customers

04/2024 - 11/2024

Flagstaff, AZ
- SEASONAL ASSOCIATE

Super Star Carwash

 - Often oversaw managment roles of maintaing customer satisfaction
 - Repaired and maintained complex mechanical systems
 - Supplied effective cleaning services

04/2023 - 07/2023

Phoenix, AZ

TRAINING

- EE599 - Multi-Agent Systems

Final Grade: A

Graduate level course focusing on the design and algorithms of self-learning robotics in dynamic swarm systems. Class resulted in my first published paper on self-learning arachnid robot capable of walking across multiple terrains.
- EE504 - Photovoltaics

Final Grade: A

Graduate level course on the design and implementation of stand-alone and grid-connected solar arrays. Including: inverter arrays, max power point tracking algorithms, solar-cell manufacturing, DC to DC converter design and permit acquisition.
- EE503 - Power Electronics

Final Grade: A

Graduate level course that primarily researched the construction, power signals, and managment of a variety of electronic motors including DC and AC designs used in industry.
- EE499 - Hardware Cryptography

Final Grade: A

Course on computer cryptography on a hardware scale. This class including the development of targeting whitelisting of power signals and hardware security of quantum systems. Class final was the creation of quantum safe whitelisting hardware for peer to peer communication.

KEY ACHIEVEMENTS

- Boeing Autonomous Engineering Lead

Led an electrical engineering team to create an autonomous car
- W. L. Gore Generator Contest Engineering Lead

Led a multidisciplinary engineering team to design and manufacture a custom high voltage generator
- Self-learning robotics paper

Co-Authored published paper about self-learning autonomous hex-bot development

EDUCATION

- Bachelors of Science in Electrical Engineering

Nothern Arizona University

08/2022-05/2026

Flagstaff, AZ
- Minor of Scienece in Cyber Security

Nothern Arizona University

08/2022-05/2026

Flagstaff, AZ

SKILLS

- Leadership

Marketing

PCB Design

Embedded Systems

Malware Analysis

Robotics
- ★★★★★

HOBBIES

- 6 Years of Mechanical Engineering Design
- 4 Years studying Botany
- 8 years in Video-game development (6 years in VR development)
- Brewing
